Re: **Caregiver Resource Centers Budget Ask - SUPPORT-\$12M for Time-Limit of Three Years**

Dear Assemblymember Arambula and Senator Eggman:

(Name of your organization) strongly supports strengthening the Caregiver Resource Centers (CRCs) to increase their impact on California's 4.7 million family caregivers who provide \$63 billion in unpaid labor to keep loved ones in their own homes, delaying or avoiding nursing home placements.

COVID-19 has increased family caregiver responsibilities and amplified caregiving burdens. Added stressors have hit Black and Latino communities especially hard. Extending the CRCs augmentation of \$10 million per year for an additional 2 years beyond the original sunset date (to June 2024) will allow the CRCs to continue expanding personalized, compassionate, and evidence-based services to family caregivers, more than half of whom work outside the home in addition to working as unpaid caregivers at home.

Adding \$2 million per year will allow the CRCs to expand their capacities to develop and implement a statewide diversity and inclusion corps to focus on underserved caregiver groups (English language limited, ethnically diverse, young, LGBTQ and those who provide complex care).

As California continues to promote home- and community-based care through the Master Plan for Aging et al, the importance and needs of family caregivers will only continue to increase. Alzheimer's and other dementias that increase in an aging society require healthy and capable caregivers to provide competent care.

Thank you for your support of the California Caregiver Resource Centers (CRCs).

Sincerely,

Your name
